

## DIRECTIONS

**Initial Treatment:** For noticeably fouled pans, add 2 tablets per ton (12,000 BTU) of system capacity. Repeat until cleaned.

**Regular Maintenance:** To keep drain pans clean, add 1 tablet per ton of system capacity per month.

**Humidifiers and Dehumidifiers:** Add 2-4 tablets every 4-6 weeks. Clean and rinse out the reservoir regularly.

**For Best Results:** Position the tablets in the drain pan as far from the drain as possible. This ensures the product flows throughout the entire pan.

Flow Treat tablets are effective in eliminating drain pan odors and water damage caused by clogged drain lines. Our proprietary *Quaternary Ammonia Technology* acts fast on sludge, scum, and other odor causing drain pan buildups. Flow Treat tablets are non-toxic, non-corrosive, leave no residues, and are biodegradable. Easiest way to keep your drain pans clean, flowing, and odor free.
