Ice Saver is a specialized, non-foaming and non-fuming ice machine cleaner and descaler. It is designed to efficiently clean and eliminate scale buildup from stainless steel and nickel-plated surfaces. Its advanced formula includes corrosion inhibitors that help protect metal while ensuring thorough cleaning. Approved by the USDA for use in federally inspected meat and poultry facilities, Ice Saver effectively removes lime scale, preventing equipment malfunctions and enhancing ice quality, taste, efficiency, and production capacity.

DIRECTIONS: Before cleaning, turn off the ice machine. Empty the water reservoir and refill it with fresh water, mixing in 3 ounces of Ice Saver per gallon. Activate the water circulation pump and let it run for 15 to 30 minutes. For areas not sufficiently exposed to the solution, use a brush to apply the cleaner directly. If heavy scaling is present, drain the system and repeat the process. Once the scale has been removed, flush and rinse at least two to three times. For stainless steel ice machine drums, mix 8 ounces of Ice Saver per gallon of water in a plastic container, then brush the solution onto affected areas. After cleaning, rinse all surfaces thoroughly with fresh water.

DANGER: Causes severe burns and eye damage. Do not breathe the mists. Wash hands thoroughly after handling. Wear protective gloves and eye protection. If swallowed: Rinse mouth. Do **NOT** induce vomiting. If on skin (or hair): Take off immediately all contaminated clothing. Rinse skin with water or shower. Wash contaminated clothing before reuse. If inhaled: Remove person to fresh air and keep

comfortable for breathing. Immediately call a poison center or doctor. If in eyes: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

STORAGE: Store locked up. Dispose of contents and container in accordance with local, state, and national regulations. Use or store with adequate ventilation. Do not transfer to unmarked container. Keep container closed. Empty container may contain hazardous product residues. Loosen closure carefully. Do not expose to heat or store at temperatures above 120°F. **KEEP FROM FREEZING.**

CONTAINS (CAS#): Phosphoric Acid (7664-38-2), Water (7732-18-5), Citric Acid (77-92-9).

HMIS RATINGS: Health - 3, Flammability - 0, Reactivity - 0, Personal - B.
